SUBJECT INDEX

Accelerated ripening of dry fermented sausage with proteinase 651
Acetic acid proportions and survival of Aniskapis sp. larvae in herring marinade 661
Acid Guanidinium Thiocyanate *see* AGT
Actinidia chinesis see kiwi fruit
Actinidin-like acitivity of kiwi pectin methylesterase inhibitor protein 121
Activation energy of beef oxymyoglobin autoxidation 1
Additives in calculations for sorption isotherms 129
Adjunct ratios in food fermentation 635
AGT and detection of hepatitis A virus in oysters 185
Alcohol content of beer determined using cerium (IV) with spectrophotometric method 469
Alginate as stabilizer of food colourants 715
Analytical Solutions of Groups *see* ASOG
Ananas comosus L. *see* pineapple
Anisakis sp. larvae survival conditions in marinated herring fillets 661
Antibody-capture ELISA with simple extraction step 563
Apple,
  effective diffusity of total solids and pectic substances 687
  osmotic dehydration and solute losses 531, 543
Apple juice, temperature and effective diffusity 687
Arabinogalactan as potential furfural precursor in roasted coffee 559
Ascorbic acid and moisture loss in pineapple storage 551
Aseptic processing of particulate food suspension streams 415
ASOG contribution method for water activity in solutions model 331
Autoxidation rate constants in bovine muscles 1
Available lysine retension by salt-dried mackeral 179
aUwu activity coefficients in solutions of sugars, polyols and urea 331

Bacillus subtilis inhibited in chicken liver/egg paté 161
Bacillus subtilis protease, effective hydrolysis of bovine caseins 279
Baker's yeast in sorption isotherm calculations 129
Banana, water sorption, kinetics 83
Barley malt and rice mashed in non-conventional mashing process conditions 635
Barrier layer at apple surface during osmotic dehydration 531, 543
Beef,
  colour change on autoxidation 1
  meatballs cooked in deep fat, model 429
Beer,
  oxidation and pasteurization 195
  quality control using cerium(IV) and spectrophotometric method 469
BET equations and dried red peppers 339
Biconversion of date wastes with isolated enzymes 255
Biopolymer from *Rhizobium trifolii* 29
Biscuits with proportions of taro flour 463
Bitter peptides from caseins by enzyme hydrolysis 279
Blood plasma protein mixtures calculations of sorption isotherms 129

Blue cod, improving shelf life with COU2u packaging 167
Blue and red tilapia fish, oxidative stability of frozen muscle 585
Bone in meat, irradiated EPR detection trials 153
Bound water in invertebrate seafoods 51
Bovine muscles' *post mortem* myoglobin autoxidation 1
Brassica spp., *see* mustards
Brine preservation of mackerel has least retention of vitamins 179
Bromelain protease hydrolysis of caseins 279
Bulk density,
  and egg white powder in extruded fish crackers 315
  of taro flours 457

Calcium alginate as stabilizer for food colourants 715
Canned chickpea dip, thermal processing requirements 441
Canning,
  and optimum shape for heat transfer model 515
  validation of model, temperatures 227
Capiscum annum see red pepper
Capsular polysacaharides from *Rhizobium trifolii see* CPS
Carboxymethylcellulose rheology, concentration and temperature effects model 243
Cardboard packages causing diisopropylnaphthalenes contamination 593
Carthamin in calcium alginate beads to stabilize food colouring 715
Carthamus tinctorius see dyer's saffron
Casein hydrolysed by proteases to different peptides 279
Catfish (channel) performance, composition and sensory quality on egg diet 9
Cellulose radical improved EPR irradiation recognition 23
Cerium(IV) reagent for alcohol determination by spectrophotometry 469
Cheese-rind after ripening, effectively irradiated without flavour loss 395
Chemical indicator of sterilized food quality modelled 227
Chemical indices of redfish quality 303
Chemical measurement of tilapia fish frozen minced muscle 585
Chemiluminescence, free radicals and pasteurization of beer 195
Chenopdium quinoa Willd *see* quinoa
Chhana whey powders, functional properties 263
Chicken deterioration analysis methods 19
Chicken eggshell irradiation detection 671
Chicken liver/egg paté storage with MAP 161
Chickpea dip, thermal processes in canning 441
Chilled smoked blue cod storage improved with COU_2u packaging 167
Cicer arietinum L. *see* chickpea
Citrus fruit juice powders, water uptake kinetics 137
Citrus fruits variation in ESR detection of Γ-irradiation 143
Clupea harengus L. *see* herring
COU_2u proportion in MAP extension of shelf-life of haddock and herring 575
COU_2u storage of chicken liver/egg paté in MAP 161
Coatings, composite, edible, physical properties 39
Coffee roasted, aromas and furfural precursors 559
Coil overlap parameters of CPS biopolymer 29
Colocasia esculenta see Taro

Colour,
changes of beef myoglobin 1
increased by egg white powder in fish crackers 315
loss in pineapple storage 551
of potato strips and reducing sugars 63
reaction of alcohol and cerium(IV) 469
Colours, for food, stabilized with calcium alginate 715
Component interactions and calculations of sorption isotherms 129
Composite edible coatings, physical properties 39
Composition,
of catfish on waste egg diet 9
and flow of sausage emulsion 321
of food and dielectric properties 699
Concentration and temperature effects on carboxymethylcellulose rheology 243
Contamination,
by diisopropoylnaphthalenes from recycled paper 593
entertoxin detected by rapid and simple ELISA 563
Controlled atmosphere packs for improved chilled smoked blue cod storage 167
Cookies with proportions of taro flour 463
Cooking beef meatballs in deep fat, model 429
Counter-current extraction of apple juice and diffusion equations 687
CPS properties and gelling concentration 29
Crackers, fish with egg white powder 315

Date wastes as substrate for enzymes in yeasts bioconversion 255
Deep frying beef meatballs, model 429
Dehulling and large grits yield improvement by modified Engelberg huller and plate mill on maize 347
Dehydration by osmosis in apple, barriers and solute loss 531, 543
Density of extruded rice starch, effect of conditions on 503
Descriptive analysis,
of canned chickpea dip 441
of redfish deterioration 303
Detection,
of entertoxin by rapid, simple ELISA analysis 563
of irradiated mango not very effective with ESR 679
of irradiation using ESR on chicken eggs 671
Deterioration,
in roast chicken rapid TBARS method 19
seafood and storage temperature 303
Diacetyl tartaric ester of monoglyceride in edible coatings 39
Dielectric properties of food, predictive equations 699
Differential scanning calorimetry and fish myosin stability 287
Diffusion equation, for reducing sugars in blanched potato strips 63
Diffusion of total solids and pectic substances from apple tissue 687
Digestibility *in vitro* of quinoa seeds after processing 449
Digoxigenin-labelled RNA probe detection of hepatitis A virus in oysters 185
Diisopropylnaphthalenes food contamination from cardboard 593
Distillation method for rapid analysis of malondialdehyde 19

Docosahexaenoic acid with PE and HUFA by pholspholipase AU2u]-mediated synthesis 721
Dosimetry techniques of irradiation of chicken eggs 671
Dried red peppers sorption equations 339
Drum-dried banana, water sorption kinetics 83
Dry milling of maize and recovery rates 347
Drying,
by osmosis in apples 531, 543
of quinoa seeds, effect on digestibility 449
DSC data on *Rhizobium trifolii* capsular polysaccharide 29
Dyer's saffron as source of carthamin with calcium alginate for colouring 715

EC grading scores on deteriorating redfish 303
Edible coatings of wheat gluten and lipids, physical properties 39
Effective diffusity of apple solids and pectic substances 635
Egg and chicken liver paté improved storage with MAP 161
Eggshell and identification by ESR of irradiation and dosimetry 671
Egg-waste diet for improved catfish compositon and performance 9
Egg white powder in extruded fish crackers 315
Eicosapentaenoic acid *see also* EPA
Eicosapentaenoic acid with PE and HUFA by phospholipase AU2u-mediated synthesis 721
Electron low energy beam irradiation of Listeria monocytogenes 395
Electron Paramagnetic Resonance *see* EPR
Electron Spin Resonance *see* ESR
ELISA for detection of staphyloccocal entertoxin A 563
Emulsified sausage flow behaviour 321
Emulsifying properties, chhana whey powders 263
Endocarp of mango and irradiation 679
Endomycopsis fibuligera polygalacturonase and invertase in bioconversion of date wastes 255
Engelberg huller modified and large grits production with maize 347
Entertoxin A detection by rapid antibody-capture ELISA 563
Enzymes,
in acceleration of ripening fermented sausage 651
hydrolysis of bovine caseins to different peptides 279
hydrolysis to test digestibility in quinoa seeds 449
inhibition of tomato pectine methylesterase 121
isolated from yeasts in for bioconversion of date wastes 255
mediation in synthesis of EPA and PE 721
pectinase not effective in apple juice production 687
in protein production in non-conventional process conditions 635
EPR,
detection of cellulosic radical in irradiated foods 23
for irradiation detection in meat with bone trials 153
Equilibrium equation of Pilosof for sorption of powdered fruit juices 137
Equilibrium moisture contents of mustard seeds 71
Erratum, thermal destruction of thiamine, pre-packaged mince meats 633
ESR,

analysis of beer during pasteurization 195
identification and dosimetry of irradiated chicken eggs 671
identification of irradiated mango 679
spectroscopy of Γ-irradiated citrus fruits 143
Ester synthesis of EPA and PE with HUFA 721
Ethanol determination with cerium(IV) as reagent 469
Extruded,
fish crackers with egg white powder 315
quinoa seeds tested for digestibility 449
rice starch – physical characteristics 503

Fat transfer in deep frying of beef meatballs 429
Fermentation, in non-conventional mashing process conditions 635
Fermented dry sausage ripening accelerated with a *Lactinobacillus* proteinase 651
Fillet fish MAP shelf-life shorter than when whole 575
Films of wheat gluten and lipids, physical properties 39
Fish,
crackers with egg white powder 315
different species and effect of temperature on myosin 287
MAP shelf-life longer as whole than fillets 575
myosin stabiltiy under temperature variation is species dependent 287
packaging, improved with COU_2u 167
pickle and survival of *Anisakis* sp. larvae in herring marinade 661
salting methods and conditions 179
shelf-life extended by low-level heat treatment without loss of sensory quality 405
Fishtester measures of redfish deterioration 303
Flavour,
beer and pasteurization 195
changes in stored pineapple 551
of haddock and herring with COU_2u MAP 575
maintained in irradiated cheeses 395
of sausage ripened more quickly with a *Lactobacillus* proteinase 651
Flour,
in calculations for sorption isotherms of protein mixtures 129
properties of processed taro 457
properties of taro and wheat mixtures 463
Flow,
behaviour index of CMC 243
rate and extruded rice starch 503
and slip behaviour of sausage emulsion in a tube 321
Fluid food optimum suspension in feed-and tank-operating systems 415
Foam capacity of taro flours 457
Foaming properties, chhana whey powders 263
Foil laminate packs for improved storage of chilled smoked blue cod 167
Food colours stabilized with calcium alginate 715
Food contamination by diisopropylnaphthalenes from cardboard 593
Food control
by detection of cellulose radical after irradiation 23
EPR irradiation detection trials for meat with bone 153

ESR irradiation detection in chicken eggs 671
ESR irradiation in mango not easy 679
of Γ-irradiated citrus fruits 143
temperature and MAP fish 167
temperature and seafood 303
Food deterioration and rapid analysis of malondialdehyde 19
Food dielectric properties and predictive equations 699
Food fermentation in non-conventional mashing process conditions 635
Food irradiation, detection 23, 143, 153, 671, 679
Food packaging contamination from cardboard 593
Food quality, chemical indicator and temperature processing models 227
Food safety,
ESR detection of mango not very effective 679
ESR irradiation detection and dosimetry in chicken eggs 671
immunoassay for enterotoxins 563
Food sterilization in optimum shape of package 515
Fractionation of wheat gluten proteins 489
Fragaria L. spp. *see* strawberries
Free radicals,
in beverages and chemiluminescence 195
in ripening mango produce similar effect to ESR 679
Freezing, myosin stability in fish storage is species dependent 287
Freezing curves modelling, seafood 51
French fries, colour and sugar loss 63
Fresh apple and osmotic dehydration 532
Frozen apple and osmotic dehydration 543
Fruit respiration in MAP microperforated packs and temperature 365
Functional properties,
of chhana whey powders 263
of taro 457
of wheat gluten and lipid barrier films 39
Furfural from arabinogalactan in roast coffee 559

GAB equation and moisture sorption,
in dried red peppers 339
in mustard seeds 71
Gas Chromotography *see* GC
Gas exchange and temperature in fruit MAP model 365, 379
GC and photometric methods compared for detemination of ethanol 469
GC/MS determination of cardboard contamination 593
Gel-electrophoresis(SS-PAGE) and hydrolysis of casein 279
Gelation properties,
of chhana whey properties 263
of *Rhizobium trifolii* CPS 29
of rice starch 503
of taro flours 457
Germ recovery in dry milling of maize 347
Gliadins in wheat gluten protein fractionation 489
Glutenins in wheat gluten protein fractionation 489

Glycerol in synthesis of EPA and PE 721

Haddock shelf-life with MAP and refrigeration 575
Haem pocket in myoglobins autoxidation in beef 1
Headspace volatiles',
  measurement of tilapia fish frozen minced muscle 585
  of roasted coffee GC/MS measurement 559
Heat processing,
  and functional properties of taro flours 457
  of horse mackerel at low levels 405
  and quinoa seeds digestibility 449
Heat sterilization, canned chickpea dip 441
Heat transfer,
  in deep frying of beef meatballs 429
  low level extending fish shelf-life 405
  and optimum package shape for storage 515
Hepatitis A virus in oysters detection methodology 185
Herring,
  fillets, marinade and survival of *Anisakis* sp. larve 661
  shelf-life with MAP and refrigeration 575
Highly unsaturated fatty acids *see* HUFA
Hommos/Hummus, thermal process in canning 441
Horse mackerel sensory quality extended by low-level heat treatment 405
HUFA with EPA and PE synthesis by esterfication 721
Hydrolysis of casein to different peptides measured by SDS-PAGE and RP-HPLC 279
Hydroperoxides measurement of tilapia fish frozen minced muscle 585
Hygrometer in measurements for ASOG contibution method of water activities 331

Ictalurus punctatus see catfish
Identification
  by ESR of irradiation and dosimetry in chicken eggs 671
  of irradiated cellulose radical optimized 23
Immunassay for entertoxin A 563
Inedible eggs for catfish diets 9
Inhibition of pectin methylesterase 121
Interaction of proteins and water activity calculations 129
Invertase in bioconversion of date wastes 255
Invertebrate seafood, freezing points of species 51
Γ-irradiated,
  citrus fruits and ESR spectra 143
  eggshells detected by ESR 671
  mango not easily detected 679
  ripe cheese rind retains sensory quality 395
Irradiated food, cellulose radical detection improvement 23
Irradiation, of soft and red smear cheeses 395
Irradiation detection,
  of chicken eggs 671
  of mango 679
  trials with international method protocol 153

Isotherms,
multicomponent in protein-containing mixtures 129
storage dried mustard seeds 71
water sorption of red peppers 339

Kernal of mango and irradiation 679
Kinetics,
of ascorbic acid loss and temperature of pineapples 551
sorption of powdered citrus fruit juices 137
water sorption of banana 83
Kiwi pectin methylesterase inhibitor protein inhibits tomato pectin methylesterase 121

Labelling compliance, EPR irradiation detection on meat with bone 153
Lactic acid formation in dry fermented sausage with proteinase 651
Lactobacillus paracasei ssp. *paracasei* NCDO151 proteinase in accelerated ripening 651
Larvae of nematodes survival rates in pickled herring fillets 661
Leaching loss of reducing sugars and temperature in potato 63
Lethal rate curves for Hommos in cans 441
Leupeptin and pectin methylesterase inhibitor 121
Levan and *Rhizobium trifolii* CPS gels 29
Lipid oxidation and TBARS determination 19, 161
Lipid-wheat protein barrier films 39
Listeria monocytogenes irradiated by low energy electrons in cheeses 395
Low energy electron irradiation of cheese rinds 395
Low level heat treatment extends shelf-life of fresh fish 405
Lycopersicon esculantum see tomato

Mackerel best salted fresh and pickle cured 179
Maize and performance of plate mill and huller for germ recovery 347
Malondialdehyde recovery by distillation 19
Maltose variations in food fermentation 635
Malus Mill. spp. *see* apple
Mangifera indica Bl. *see* mango
Mango, ESR irradiation not easily detected 679
MAP,
haddock and herring shelf-life 575
with microperforations
gas exchange model 365
model tested on strawberries 379
storage of chicken liver/egg paté 161
Marinade proportions and survival of *Anisakis* sp. larvae in herring fillets 661
Mashing rice and barley malt in non-conventional process conditions 635
Mass transfer phenomena in osmotic dehydration of apple 531, 543
Meat,
with bone and EPR irradiation detection trials 153
colour changes with autoxidation 1
emulsions and slip in tubes 321
Meats' variation in thiamine loss with heat treatment corrected figure 633
Melanogrammus aeglefinus L. *see* haddock

Methods,
of detection of hepatitis A virus in oysters 185
of optimum operation for fluid food suspension in tanks 415
Microflora,
in packaged fish temperature and storage 167
spoilage in chilled smoked blue cod COU2u storage 167
Microperforated MAP, models for gas exchange 365, 379
Microwave heating and dielectric properties of food 699
Modelling,
carboxymethylcellulose rheology concentration and temperature 243
cooking beef meatballs in deep fat 429
of equations on dielectric properties of food 699
freezing point depression models tested 51
freezing seafoods 51
gas exchange and temperature of fruit in MAP 365, 379
optimal surface quality sterilization temperatures 227
package shape and heat transfer 515
particle distributions in food suspensions 415
red peppers, water sorption isotherms and equations 339
sorption data for mustard seeds 71
sorption isotherm in peppers 339
water activities prediction with ASOG contribution method 331
water activity in pineapple storage 551
Modified Atmosphere Packaging *see* MAP
Modified GAB equation, mustard seeds 71
Moisture
barrier and transfer in edible coatings 39
content and dielectric properties of food 699
and extruded rice starch 503
loss in pineapple storage as temperature function 551
monolayer of dried red peppers 339
sorption equations mustard seeds model 71
transfer in deep frying of beef meatballs 429
Monoglycerides and wheat gluten in edible coatings 39
Musa L. spp., dried, water sorption 83
Muscle,
of fish species varies after freezing 287
of frozen minced tilapia fish, chemistry and stability 585
Mustard seeds, moisture model 71
Myoglobins autoxidation in beef muscles 1
Myosin in fish denatures variably with temperature and species 287

Nematode larvae survival in marinaded herring fillets 661
NMR measurement of beef muscle autoxidation 39
Non-competitive inhibition with tomato and kiwi 121
Non-conventional process conditions for mashes 635

Off-flavour,
from free radicals in pasteurized beer 195

with irradiation of whole cheese with X-rays 395
Operating chart for optimum particle suspension distribution in tanks 415
Operating conditions effects on extruded rice starch 503
Operating parameters for stirred tanks of food suspensions 415
Optimal feed conditions for fluid food particle suspension consistancy 415
Optimal surface quality sterilization temperatures 227
Oryza sativa see rice
Osmotic dehydration of apple, mass transfer phenomena 531, 543
Osmotic pressure and diffusion in apple 687
Ostrea see oyster
Oxidative measurement of tilapia fish frozen minced muscle 585
Oysters, detection of hepatitis A virus using AGT and digoxigenin-labelled RNA probe 185

Package shape and optimum heat transfer 515
Packaged minced meats, thiamine loss, corrected figure 633
Packaging,
causing diisopropylnaphathalene contamination 593
see also MAP
Parapercis colias see blue cod
Particle suspensions optimized in particulate fluid food streams 415
Pasteurized beer and free radicals 195
PE synthesied by phospholipase AU2u mediation, and HUFA 721
Pectic substances effective diffusity from apple tissue 687
Pectin methylesterase in non-competitive inhibition in tomato and kiwi 121
Pectinase enzymes not effective in production of apple juice 687
Peppers, moisture sorption isotherm 339
Peptides, from hydrolysed casein 279
Performance of catfish on waste egg diet 9
Permeability of composite edible coatings 39
Peroxide value and MAP for herring 575
pH,
higher in dry fermented sausage with a *Lactobacillus* proteinase 651
variation in non-conventional mashing process conditions 635
Phenolics in mango and irradiation 679
Phosphatidylethanolamine,
with HUFA synthesised by phospholipase AU2u-mediation 721
see also PE
Phospholipase and phosphatidylethanolamaine synthesis with HUFA of EPA and PE 721
Physical properties,
of *Rhizobium trifolii* CPS 29
of wheat gluten and lipid coatings 39
Pickle cured mackerel retains most vitamins 179
Pickle marinade and survival of *Anisakis* sp. larvae in herring fillets 661
Picornavirus detection in oysters 185
Pineapple ascorbic acid and moisture loss, storage temperature 551
Polarimetry of *Rhizobium trifolii* CPS 29
Polygalacturonase in bioconversion of date wastes 255
Polyols and ASOG contribution method of water activity prediction 331

Pore expansion in dry bananas 83
Porphyrin orientation in beef muscles 1
Potato, diffusities of reducing sugars and temperature 63
Predictive equations for dielectric properties of food 699
Preservation of herring fillets and Anisakis sp.larvae survivial 661
Process conditions variation in mashing 635
Process parameters for constant distributions of food suspensions in stirred tanks 415
Processed food colourants stabilized by calcium alginate 715
Protease in non-conventional mashing process conditions 635
Protein degradation hastened in sausage with 12UgS-1s proteinase 651
Protein fractions of wheat gluten 489
Protein mixtures calculation of water sorption isotherms 129
Protein of quinoa seeds made more digestible by moderate heating 449
Protein solubility, chhana whey powders 263
Proteinase from *Lactobacillus paracasei* ssp. *paracasei* NCDO151 in ripening sausage 651
Proximate analysis of taro flours 457, 463
Psychrophilic contamination for fish is reduced by low level heat treatment 405

Quality control method for ethanal in beverages 469
Quality of fish required for successful storage 179
Quinoa seeds processed for in vitro digestibility assessed by enzymic method 449

Radical reactions in beer oxidation 195
Radicals in spectral changes of Γ-irradiated citrus fruits 143
Rancid chicken, rapid analysis of TBARS 19
Rapid analysis,
  for enterotoxin A with simple antibody-capture ELISA 563
  of ethanol in beverages using cerium(IV) in spectrophotometry 469
  of malondialdehyde in rancid chicken 19
Recovery of melondialdehyde from rancid chicken for TBARS determination 19
Recycled paper packaging contaminating food 593
Red and blue tilapia fish frozen muscle oxidative stability 585
Red cheeses and *Listeria monocytogenes* irradiated by low energy electrons 395
Red food colourant stabilized by calcium alginate 715
Red peppers, dried, water sorption isotherm and equations 339
Redfish quality and shelf life, sensory analysis and Fishtester 303
Reducing sugars loss in potato strips 63
Residence-time distributions in particulate food suspension streams 415
Resistance methods for redfish grading 303
Reversed phase-high performance liquid chromatography (RP-HPLC) and hydrolysis of casein 279
Rheology of CMC, effects of concentration and temperature 243
Rhizobium trifolii capsular polysaccharides, properties 29
Riboflavin retained in salt-dried mackerel 179
Rice and barley malt mashed in non-conventional process conditions 635
Rice starch – extrusion and effects of operating conditions 503
Rind of cheeses and irradiation levels 395
Ripening of dry fermented sausage accelerated by a Lactinobacillus proteinase 651

Royal red food colourant stabilized by alginate 715

Saccharomyces cerevisiae see baker's yeast
Safflower yellow B in calcium alginate beads to salbilize colouring 715
Salt proportions and survival of *Anisakis* sp. larvae in herring fillets 661
Salting, fish freshness and methods 179
Saponin removal and quinoa digestibility 449
Sausage,
  emulsion in simple tube viscometer flow behaviour 321
  ripening accelerated by a *Lactobacillus* proteinase 651
Scomber scombrus L. *see* mackerel
Seafood, model of freezing points effective within species 51
Sebastes marinus L. and *Sebastes mentella* Travin *see* redfish
Selectivities of wheat gluten protein fractions 489
Sensory analysis and redfish deterioration 303
Sensory quality
  canned chickpea dip 441
  of catfish on waste egg diet 9
  and cheese irradiation 395
  of fresh fish extended by low-level heat treatment 405
  of optimum package shape for storage 515
  of pineapple and moisture loss 551
  of sausage ripened more quickly by proteinase 651
  of taro- and wheat-flour cookies acceptable 463
Shape of package for optimum sterilization 515
Shelf-life,
  of chicken liver/egg paté in modified atmosphere packages 161
  chilled smoked blue cod and COU2u packaging 167
  of fresh fish extended by low-level heat treatment 405
  of fruit in MAP in gas exchange model 365, 379
  of ice-stored redfish with Fishtester 303
  longer for whole fish than fillets 575
  of pasteurized beer, and ESR analysis 195
Shellfish, hepatitis A virus detection with digoxigenin-labelled RNA probes 185
Sinapis alba seeds, moisture model 71
Skin variations in effects of Γ-irradiation of citrus fruits 143
Smoked blue cod, improving shelf life with COU_2u packaging 167
Soft cheeses and *Listeria monocytogenes* irradiated by low energy electrons 395
Soft drinks quality control with spectrophotometry 469
Solanum tuberosum L. *see* potato
Solid state fermentation of date wastes by yeasts 255
Solute diffusion from apple tissue 687
Sorbate in marinade reduces survival of *Anisakis* sp. larvae in herring fillets 661
Sorption,
  characteristics of dried red peppers 339
  isotherms calculations and protein mixtures 129
  kinetics,
    citrus fruit juices powder 137
    drum dried banana 83

Species dependence in temperature and fish myosin stabiltiy 287
Spectrophotometric determination of alcohol content in beer with reagent cerium(IV) 469
Spoilage,
odours in smoked blue cod packages 167
pineapple, kinetics and temperature 551
of redfish in storage conditions 303
Spread factor of taro and wheat flour cookies 463
Stability,
of taro flours 457
tilapia fish muscle 585
Stabilization of red and yellow food colourings with alginate 715
Staphyloccus aureus entertoxin A detection by rapid antibody-capture ELISA 563
Starch,
gelatinization and French fries 63
of quinoa seeds made more digestible by extrusion and drum drying 449
Sterilization,
methods in canning chickpea dip 441
optimal temperatures models 227
and package shapes for optimum heat transfer 515
Stirred tank operation for optimum particle suspension distibution 415
Storage
fish species vary in myosin stability after freezing 287
of fruit in MAP and gas exchanges model 365
improvements,
for chicken liver/egg paté with MAP 161
chilled smoked blue cod with COU_2u packaging 167
mustard seeds, isotherms 71
pineapple moisture and ascorbic loss and spoilage 551
of redfish and sensory quality 303
of salt-dried mackerel and vitamin content 179
stability of dried red peppers 339
of strawberries in MAP and gas exchanges 379
Strawberries, storage in microperforated film MAP and gas exchange 379
Sucrose and furfural in roast coffee 551
Sugar degrading enzymes in bioconversion of date wastes 255
Sugars,
and ASOG contribution method of water activity prediction 331
loss by diffusion in French fries, temperature 63
Supercooling, seafoods 51
Surface ionizing treatment of cheeses for Lactobacilli without sensory quality loss 395
Surface quality
and heat transfer model 515
and sterilization temperatures 227
Survival of *Anisakis* sp. larvae in marinated herring fillets 661

Tank operation for optimum particle suspension distribution 415
Taro flour in cookie formulation 463
Taro flours functional properties raw and precooked 457

TBARS,
determination in rancid chicken 19
values with storage of Chicken liver/egg paté in MAP 161
Temperature,
and dehydration by osmosis in apple 531, 543
effects on carboxymethylcellulose rheology 243
and extrudion of rice starch 503
and microflora in packaged fish 167
optimal surface quality for sterilization 227
pineapple ascorbic acid and moisture loss 551
stability variation in fish myosin is species dependent 287
sugar loss in French fries 63
Testa of mango and irraditation 679
Texture improvement of sausage with a Lactobacillus proteinase 651
Texture measurement of taro- and wheat-flour cookies 463
Thermal destruction of thiamine, packaged minced meats, corrected figure 633
Thermal modelling and dielectric properties of food 699
Thermal process in canning hommos 441
Thermal processing models tested 227
Thermal stability of *Rhizobium trifolii* CPS and levan 29
Thiamine,
loss in heat treatment of minced meats packages 633
retained in salted-dried mackerel 179
Thiobarbituric acid-reactive substances *see* TBARS
Tilapia fish muscle stability 585
Tocopherols measurement in tilapia fish frozen minced muscle 585
Tomato pectin methylesterase and kiwi pectin methylesterase inhibitor 121
Trachurus trachurus L. *see* horse mackerel
Triticum spp. *see* wheat.

Urea and ASOG contribution method of water activity prediction 331

Virus, hepatitis A detected in oysters with digoxigenin-labelled RNA probe 185
Viscometer and sausage emulsion flow behaviour 321
Viscosity
of canned chickpea dip 441
of chhana whey properties 263
of extruded rice starch 503
and flow in sausage emulsion 321
of fluid in stirred tanks 415
of raw and precooked taro 457
of *Rhizobium trifolii* CPS gels 29
of taro flours 457
Vitamin C loss in stored pineapple 551
Vitamin contents after different methods of mackerel salt-drying 179

Waste egg diet for improved catfish performance 9
Water-absorption barrier, bananas 83
Water activity,

in pineapple storage modelled 551
prediction with ASOG contribution method 331
Water loss in dry fermented sausage with a *Lactobacillus* proteinase 651
Water retention of taro flours 457
Water sorption,
characteristics of dried red peppers 339
of citrus fruit juices as powder 137
equations for mustard seeds data compared 71
isotherms calculated for multicomponent protein mixtures 129
kinetics,
citrus fruit juice powder 137
drum-dried banana 83
of raw and precooked taro 457
Water vapour permeability of edible coatings 39
Waxes and wheat gluten in edible coatings 39
Wheat gluten,
and lipids in edible coatings 39
protein fractionation and composition 489
Whey powders (cchana) properties 263
Whey protein in calculations for sorption isotherms 129

X-rays irradiation produce off-flavours in soft cheese 395

Yeast,
in calculations for sorption isotherms 129
polygalacturonase and invertase in date waste bioconversion 255

Zea mays see maize
